**Grants and Opportunities:**

The USDA Local Food Promotion Program (LFPP) offers planning and implementation grant funds to support the development and expansion of local and regional food business enterprises, along with developing more farmers' market opportunities. Two types of project applications are accepted under LFPP—planning grants and implementation grants. Applications are due by June 20th. Check this [website](#) for more information, and listen to the [informational webinar](#).

Let’s make healthier changes at your students’ school! Fuel Up to Play 60 can help! They’re offering up to $4,000 per school to implement the Fuel Up to Play 60 program. The next application deadline is today. Visit [this website](#) to learn more!

The USDA Farmers' Market Promotion Program grants attempt to increase consumption and access to locally and regionally produced agricultural products. They also improve local markets by developing, improving, expanding, and providing outreach, training, and technical assistance for farmers markets, roadside stands, community-supported agriculture programs, agritourism activities, and other opportunities. USDA hosted an [overview webinar](#) on May 13 with more information. Also, find the request for proposal and other resources on the [program website](#). The application deadline is June 20.

A $35,000 research grant is available through the Academy of Nutrition and Dietetics. If you are a registered dietitian nutritionist and interested in childhood obesity prevention, a one-year grant is available for a research
project focusing on lifestyle intervention for kids. The application deadline is July 1. Find out more information [here](#), or email [Amy Donatell](mailto:amy_donatell@usda.gov).

**Update your farmers market info on the USDA website. This map will help buyers find your location.**

The US Department of Agriculture is accepting proposals from public and private institutions of higher education for a grant to research behavioral economics and its influence on healthier food choices. This research aligns with further USDA funded research from the Cornell Center for Behavioral Economics in Child Nutrition Programs. The focus populations will be those receiving SNAP or WIC funds. The goal is to figure out the factors that would facilitate healthy and cost effective food choices. Applications are due by June 30, 2014. Click [here](#) to read the grant announcement.
